
CLIENTS
ONE CALIBER ASGI APPLICATION
STATE & EXTERNAL
Browser
React SPA session
API client
account-scoped
Service caller
published workflow
Production agent
the consumer, outside the control plane
Admission
session or token, scopes, CSRF and rate limit (opt-in)
Route handlers
570 declarations
SSE + webhooks
live events
Aria tool loop
risk-tiered
Author > Test > Evaluate > Calibrate > Release > Observe
Orchestrator
triage, diagnose, candidate
Evaluation
scorecards, LLM judges
Calibration
5 optimizer paths
Apply + promote
gate, alias, checkpoint
execution policy, gate verdicts, release control, audit log
config, persistence, storage, tool execution, providers
Durable queues
status, claim and lease columns on rows
Up to 10 in-process loops
no separate worker tier
Refinement, CalibrationDrain, WorkflowRun, AriaPlan, KnowledgeBase, WorkspaceImport, Scheduler, Janitor, ReleaseReconciler, WebhookDispatcher
MLflow 3.14+
prompt versions and aliases, traces, assessments
PostgreSQL 17
112 tables: metadata and the file inventory
Object storage
file bytes only
LLM providers
OpenAI, Claude, Gateway
MCP servers
containment or sidecar
Event transport
NATS, Redis, DB
the agent resolves @prod at call time and emits traces: when Release rotates the alias, the next call runs the new version, no client redeploy
